

Hosts
Meta & Cerebral Valley

Meta Global AI Developer Hackathon

Remote
Oct 27, 2:00 AM – Nov 5, 11:00 AM (GMT+9)

Event Finished

Come and build the future of superintelligence.

Ten days, access to our newest models and **$1M in prizes**. The Meta Global AI Developer Hackathon is virtual, worldwide and free to enter if selected.

About the Hackathon

Apply to spend ten days building with Meta's newest models. Use the Muse Spark series, Muse Wonder, Muse Image and SAM 3.1 through Meta Model API, run Meta open weights models, and code faster with Muse Code coding agent.

Bring a problem you know firsthand, or an idea that feels out of reach. Build it with the models, learn from the Meta team and partners in live workshops, and compete for a share in the **$1,000,000** cash prize pool across two tracks: one for indie developers and one for startups.

Partners

We have an amazing set of inference partners supporting the event:

- Baseten is offering $100 in credits and 2M TPM rate limits to select participants to use Meta's open-weights models.
- Modal is offering $100 in credits to select participants to use Meta's open-weights models through Endpoints in addition to their serverless GPUs, sandboxes, and tools for LLM training.
- Fireworks is offering $100 in credits to select participants to use Meta's open-weight models along with a workshop from Sinan Ozdemir
